# PETROL FILTERS AND DIESEL FILTERS KEEP THE ENGINE RUNNING...

High quality fuel filters will ensure that the engine will get enough fuel and prevent power loss. When this filter is clogged, it can prevent the engine to start properly – sometimes even not at all – and it can cause damage to other valuable parts. Champion’s fuel filters for both petrol and diesel engines protect the most important components of your engine against damage.

## Diesel

### High performance fuel filters for a new engine generation

New Common rail diesel injection engines require strict water separation to protect the injection system from corrosion, cavitations and other negative effects. That’s why Champion now uses new multi-layer synthetic melt-blown media, standing for filtration up to 3 microns. Its three-layer structure is formed by thermal bond without using any binders and adhesives.

## Petrol

Fuel systems are very sensitive to contaminated fuel. Even the smallest particles can cause problems, mainly because tolerance of the moving parts in pumps and injectors is very limited. This is why fuel systems should employ one or more high grade filters, to keep a car in perfect shape and protect the engine.

### Protect your engine from damaging issues such as:

- **Power loss:** When the fuel mixture required by the engine is too lean, it can cause misfire, making the engine troubleshoot and potentially damage the catalyst.
- **Starting properties:** A clogged filter will increase the required time to get to the ideal pressure in the fuel line, resulting in starting problems.
- **Damage to other components:** An old or low efficiency filter can lead to damage caused to expensive parts of modern rail injection systems.

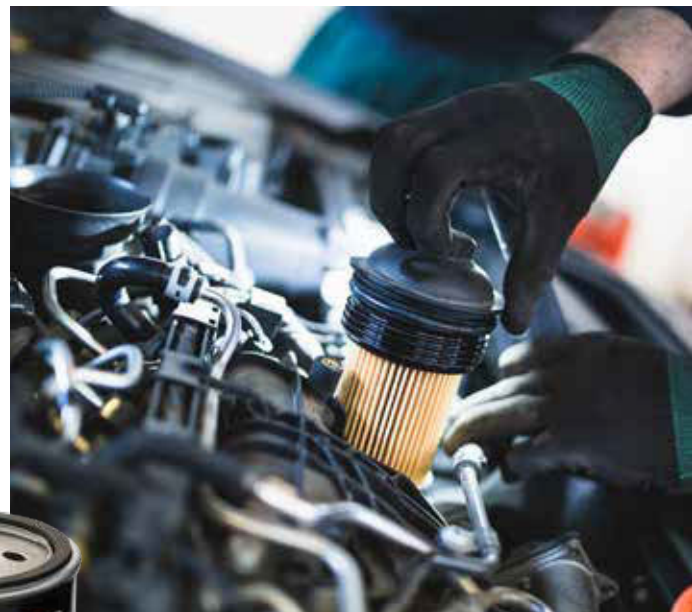

# CHOOSE WISELY: NO FILTER IS CHANGED MORE OFTEN THAN AN OIL FILTER!

Ideally, the oil filter is to be replaced every time the oil is changed, or even more often, in case of maximum loads and frequent stop-and-go driving. A clogged filter leads to excessive engine wear, as the lubricated parts need to process unfiltered oil full of combustion residue, metal particles, dust and more.

## Champion Oil Filters: featuring micro fiberglass media

The treated and pleated paper (cellulose) that was stuffed inside the oil filters can or cartridge is sometimes no longer enough. According to the OE specs of some cars, Champion is offering a new revolutionary technology to keep engines running as smooth as possible: oil filters with micro fiberglass media and synthetic-cellulose blends.

**The Champion filter range offers solutions for over 94%\* of cars in the EU.**

# GIVE YOUR CAR AND ITS DRIVER A BREATH OF FRESH AIR

Allergies, bad smelling air conditioning, increase of fuel consumption, reduced performance due to a badly working heating system... Those things happen when you don't replace your cabin filter every 10.000 km or every year. It can even compromise driving safety, as poor air circulation can fog up windows.

- Champion's range of cabin filters provides clean air for about 92%\* of cars in the European car park. This extensive range contains both particle and carbon filters.
- Each filter packaging has a QR code, giving you access to clear installation instructions.
- Some cabin filters come with a flexyframe for easy installation and to avoid damages when installing the new filter.

# FOR MAXIMUM ENGINE PROTECTION AND PERFORMANCE

No more black smoke or power loss. No more engine damage and increased consumption.

- Designed to meet the high standards of OE manufacturers, Champion air filters remove up to 98%\* of all contaminants that could cause damage to an engine's cylinders and fuel injection.
- The Champion range includes all types of filters: panel, round or cylinder-shaped filters.

# EASY TO INSTALL WITH OUR PRACTICAL INSTALLATION VIDEO

On our packaging, you will find **innovative video installation instructions** that are available via **QR code**. Another example of how Champion sets itself apart from the competition!

**Application data** is provided on the pack. Help is also available online, simply scan the on-pack QR code with your smartphone to link to a **practical installation video** for your specific cabin filter. Alternatively you can download a PDF guide from our website catalogue.

# WANT TO CHANGE A CHAMPION CABIN FILTER? HERE'S HOW IT'S DONE!

## 1. Find out where the car's cabin filter is located

The filter is readily accessible in most cars. However, the location varies widely from model to model. It may be under the hood, under the dashboard, behind the glove compartment, etc. The owner's instruction manual or a friendly professional will usually tell you where it is.

**TIP:** the drawing on the pack shows you the location!

## 2. Remove it and install your new Champion cabin filter

Changing a cabin filter is fairly easy. In the case of Champion it is even easier, as many filters are equipped with a fitting handle.

**TIP:** use the installation sheet, the web catalogue or our installation video to help you!

### ► DID YOU KNOW...

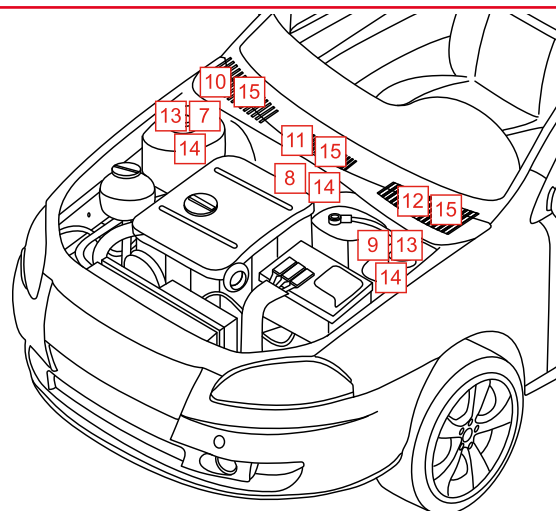

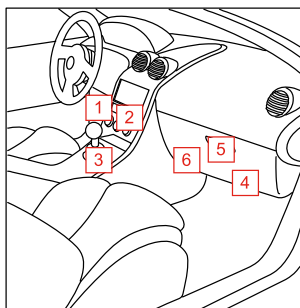

That you can easily change the cabin filter yourself? On average, it only takes about 15 minutes of your time.
